SPECIAL TREATMENTS

HIGH-EFFICIENCY CRYSTAL MICRODERMABRASION

90 min 120 €

When skin becomes a problem area – for example due to wrinkles, age spots or acne scars – the professional treatment helps. During a microdermabrasion treatment, special crystals gently remove almost invisible cornification and dead skin cells. This provides the skin with a regeneration impulse, laying bare smooth, new skin. Skin renewal, circulation as well as collagen and elastin production are intensively promoted. This activates the skin and encourages it to absorb deeply penetrating care products even better. Ultrasound vibrations make cell membranes imperceptibly increase the skin's permeability, although it is precisely their imperceptibility that makes the effect even more intensive. This allows subsequently applied active ingredients to penetrate into the deeper dermal layers in order to develop their full effectiveness over a longer period of time. The treatment also improves lymphatic flow and cell metabolism.

IONTO MESOTHERAPY

90 min 120 €

Ionto Meso facial is a solution for a client looking for the maximum effect and immediate results. Unlike ordinary mesotherapy Ionto Meso machine's microscopic needles are moving at high speed, up to 150 beats per second while painlessly opening only the top layer of skin allowing large quantity of active ingredients (hyaluronic acid, anti aging active ingredients) to absorb into the skin. As a result the skin looks visibly more youthful, smooth and glowing. During the treatment the skin is cleaned and peeled to maximize the effect of active ingredients. This treatment is finished with rejuvenating moisturizing mask to guarantee the maximum results.
